

# OSTRATICKÝ

special agricultural machines for vineyards and orchards

## Horizontal mulching machine HM3, HM4

Type	Working width	Width	Height	No of knives	Weight
HM3 1.0 m	95 cm	105 cm	23 cm	1	95 kg
HM3 1.1 m	110 cm	121 cm	25 cm	1	115 kg
HM3 1.2 m	125 cm	136 cm	25 cm	1	135 kg
HM3 1.5 m	150 cm	163 cm	28 cm	1	180 kg
HM3 1.7 m	170 cm	183 cm	28 cm	1	225 kg
HM4 2.4 m	200 - 240 cm	245 cm	28 cm	1	560 kg

The horizontal mulching machines HM3 are the one-rotor, HM4 two-rotor, mulching machines established for mulching grass and liquidation of weeds, crushing small woods in the vineyards and orchards. They're established for simple applications, where isn't putting emphasis to a high quality of mow and his mulching to the base, but is needed high working performance. The main using of this machine is for mulching the old pasturelands, liquidation weeds on the different places, in vineyards and orchards or in forestry, for example. The mowing system is based on the one rotor (or two, depend on type) with one knife with two crushing edges (serial equipped) or set of mulching chains (option, only for one-rotor) witch are intender especially for work on very stony piece of land The massive and simple construction is resistant to a breakdown and the machine is simple to maintenance.
