The tunelly knife trimmers COMPACT ST intended for summer trimming of green twigs in the vineyards of arbitrary span are the new product of OSTRATICKY company. They combine the easy construction of one-side trimmers

(universal lifting post, fitting with side shift) and high working performance of tunelly equipments, provided by minimalise of going through vineyard. At design and construction this equipments are used long-time experiences with production trimming bars, practically verified technologies as well as a new materials and procedures. The trimming bars are made from special designed profile from stainless steel, are mounted on solid construction from steel rectangular tubes. The knives with special designed edges are made from the high-grade steel improved by heat treating. Universal lifting post with hydraulic height and inclination adjusting, together with easy adjusting of working angle of vertical trimming bars, enable to use this equipment in a small family enterprises as well as in the winegrowing large-scale production. The tunelly knife trimmers of ST range are basically delivered with safety clutch of vertical trimming bar for improve the working comfort and minimalise the possibility of damage. Universal design of operating elements and the suspension on a tractor make possible to use the lifting post of trimmer for gripping other equipments like vines stem cleaner, leaves remover and other. Machine is possible delivery as double-side too.

Type	Number of upper knives	Number of vertical knives
