Tunelly knife trimmers COMPACT STS

Take advantage of technology we bring you:

- mounting on universal lifting post
- knives with special designed edge
- automatic guiding system with tracers
- swinging head with damper
- parallelogram side shift suspension
- twigs lifters for high working efficiency
- shock protection on both of vertical trimming bars
- hydraulic shock protection of rotors
- hydraulic height, inclination and side shift adjusting
- independent height adjusting upper trimming bar
- simply adjusting of inclination vertical trimming bars
- using of lifting post for other equipments

The tunelly knife trimmers STS are intended for summer trimming of green twigs in the vineyards of arbitrary span. On the design and construction

this equipments are used long-time experiences with production trimming bars, practically verified technologies as well as new materials and procedures. The trimming bars are made from special designed profile from stainless steel, are mounted on solid construction from steel rectangular tubes. The knives with special designed edges are made from the high-grade steel improved by heat treating. The tunelly knife trimmers are basidly delivered in simple mechanical version or with many hydraulic or electro-hydraulic options. This improved work with tunelly knife trimmer and make work easy especially in the winegrowing large-scale production. Universal design of operating elements and the suspension on tractor make possible to use the lifting post of trimmer for gripping other equipments like vines stem cleaner, leaves remover and other. Machine is possible delivery as double-side too.
