special agricultural machines for vineyards and orchards

Vine stem cleaners

The OSTRATICKY vine stem cleaners serves for cleaning ripe stems of grape especially in the spring time. They use the unique system with double-brushed working mechanism which was developed and designed in OSTRATICKY company on the basis of long standing tests of different working principles. Working device with two vertical, counter-rotating brushes remove lower sprouts perfect, clean stems out off old rind and leaves and it's still thrifty to wood. Working tool is equipped by special sensitive plastic cord, which is optimally adapted to condition in concretely vineyard and don't make any surface damages on grape stems. Vertical axle of rotation on the wine stem cleaners OSTRATICKY ensure perfect cleaning also in bottom

part of vine stems, where the cleaning machines with horizontal axle of rotation doesn't work satisfactory. Because this working principle is

Type	Length of brush	Diameter of brush	Material	Working position
NORMAL 45/30	30 cm	45 cm	P/G	horizontal
DUPLEX 45/30	30 cm	45 cm	G/P	vertical
DUPLEX 45/60	60 cm	45 cm	P/G	vertical
DUPLEX 45/60 T	60 cm	45 cm	P	vertical

asked by some users, have the OSTRATICKY one model of classic type (horizontal) in the production program too. Construction of vine stem cleaners OSTRATICKY make possible, depend on type and model, suspension to the front on lifting post used for trimmers too or to the side, between wheels of tractor, on universal interwheel lifting post, which is used for mounting the swinging sections or other special equipments. For reach the highest working outputs was designed special tunelly vine stem cleaner used two ground machines and make possible simple and effective cleaning both side of one row. The vine stem cleaners OSTRATICKY are designed as universal machines for installation to various types of tractors, including small tractors or caterpillars.
